NewMet

Quality and excellence in materials solutions for aerospace

NewMet is a leading supplier of silicone and other material solutions to the aerospace industry.

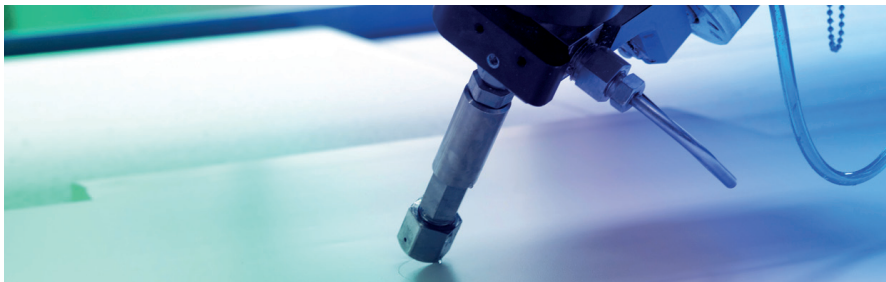

Our focus is on supplying high performance materials, understanding your applications and developing custom-engineered solutions to give your products the edge.

We meet detailed specifications for customised shapes and 3-d parts using CAD in conjunction with our cutting, moulding and extruding machines. We also offer a range of adhesive and masking solutions, including self-adhesive parts.

NewMet has six manufacturing and development sites located across the UK and in Germany. From these sites, we produce silicone extrusions, gaskets, moulded, sewn and fabricated parts and other items manufactured from our specialist materials.

Newmet is actively involved in research, testing and product development in response to our customers' needs.

We have a reputation for quality and excellence. As a long-standing supplier to the aerospace industry, we can demonstrate a consistent track record of delivering on our quality commitment.

HUB Electronics Limited

Incorporating Protech Component Consultants

Our sales team have over 35 years' experience in supplying electro-mechanical product to many customers in a wide variety of markets. This has led us to deal with more integrated solutions to assist our customers design engineers achieve completed projects more quickly and efficiently through one company.

We use our dedicated in-house customer management system to manage product allocation, drawings, part Bom's, traceability and costs.

We offer latest design solutions for the harshest environments and specialist applications. This coupled

with good supplier and franchise agreements, low overheads and competitive pricing offers Customers' a personalised complete service. We can quote and supply custom cable assemblies, harnesses & looms.

We specialise in independent product advice regarding connectors, screened/non screened back shells, adhesive lined boots/shapes and cable/conduit products. Many of these products are standard stocked lines, ready for immediate supply or for integration in to cable. From simple data assemblies, through to more complex circular multipin, commercial, industrial and military cables and looms, our sales team can assist in providing a quick, professional quotation, and qualification sample if required.

DSEI - Stand S3-340
